

Skylight Motorized Blind

Skylights are great until the sun comes up and cancels your plans for late morning rest and relaxation.

Shield yourself from the morning sun with a motorized blind for your skylight. And, with a handy remote and wired setup, you won't even need to get out of bed.

Comes with a remote control, wires into 110V power, comes with our three color options or custom color if requested. Hangs from the bars of the dome by four wires, one in each corner for easy leveling.
