

## Two-Layer Insulation

Achieve a clean, finished look that helps save money on your heating.

This two-layer insulation combines an air barrier and cotton-based canvas to increase your energy efficiency and help you warm your space on cold spring nights and cool autumn mornings. Combine our two-layer insulation with a source of heat to turn your dome into a cozy space made for year-round stargazing.

**Additional Specifications:** Can be replaced by section if wrecked or stained. The insulation is an 18mm thick thinsulate water and mildew proof, fire retardant. Then on the interior of the dome is covered by a thick canvas material. Available in White, Khaki or Grey and custom colours available upon request.
